

GE HealthCare

GoldSeal™

Certified Pre-Owned

GE HealthCare believes in offering top-quality imaging equipment—no matter the budget. That's why our GoldSeal Systems provide cost-effective solutions that empower healthcare organizations to provide excellent care and achieve financial objectives.

Giving systems a second life

Our stringent selection standards ensure that only systems with well-known and acceptable service histories are chosen by GE HealthCare Field Engineers to qualify for GoldSeal.

These systems will go through a detailed reconditioning process to meet ISO 13485 certified OEM specifications and achieve the same quality standards and results as a brand-new equipment.

Systems are upgraded with the latest possible technology, backed by the same warranty and certified following all FDA requirements.

Examination, Selection & De installation

The GoldSeal process starts by selecting systems with years of useful life remaining and examining service history to assure that we can meet stringent standards.

Decontamination

Once professionally deinstalled by GE HealthCare technicians and delivered to our warehouse, systems are disinfected in a decontamination chamber.

Inspection & Cleaning

Systems go through a rigorous inspection and deep interior and exterior cleaning.

Parts replacement by OEM parts & Painting

Each system goes through an exacting, proprietary process to meet original specifications and performance quality, using only OEM parts.

Daily monitoring

Magnets are connected to cooling stations and monitoring systems to daily monitor magnet parameters and helium levels.

Helium refills & Cold Head exchanges are performed onsite.

Installation & Service

Each system is delivered to the same level of operational performance and field uniformity.

Think beyond equipment

GoldSeal gives you more

Imaging equipment is more than a purchase—it's an investment. That's why GE HealthCare goes above and beyond to give our customers more than just high-quality products.

Same-as-new warranty with equipment

Software updates to the latest compatible release

Optional staff training from GE HealthCare clinical applications specialists

Remote service capabilities—such as OnWatch™ and Tube Watch™—for compatible systems

A robust contract package including site planning, installation, and support documentation

Flexible configurations to meet your needs, including options for enhanced software and special accessories for advanced clinical applications

GE HealthCare

Contributing to a healthier planet

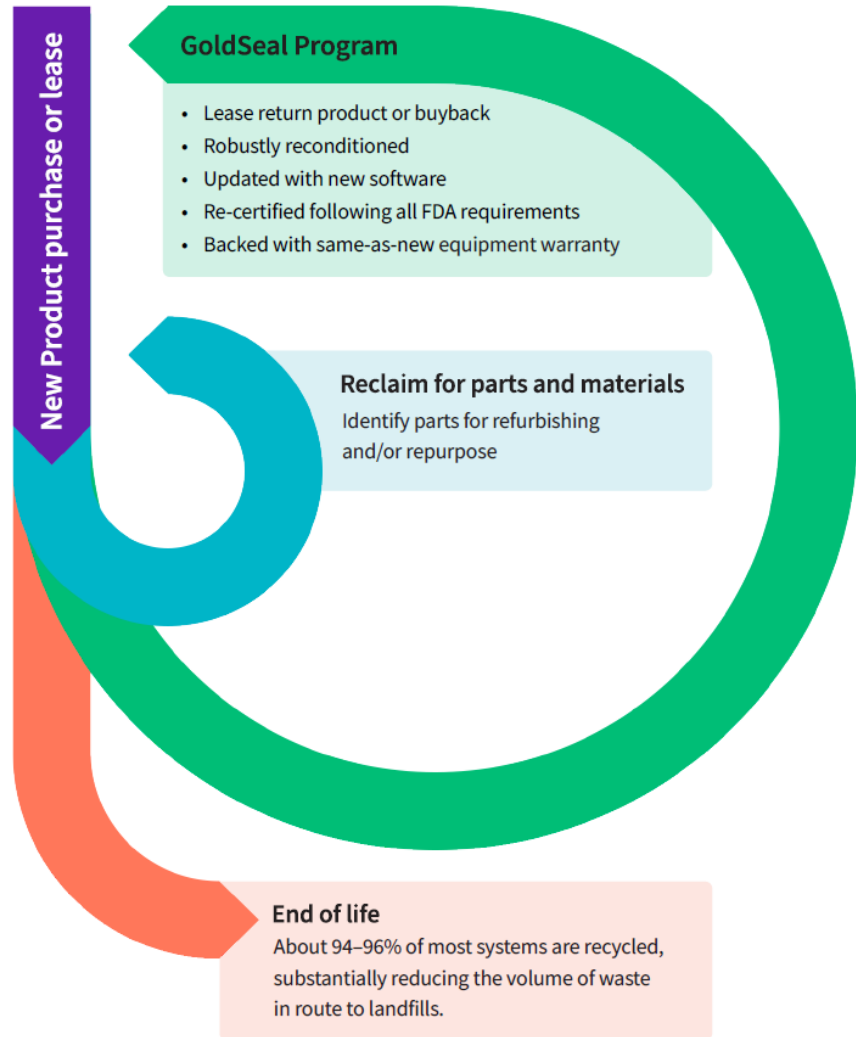

GE HealthCare is committed to achieving net zero emissions by 2050

For more than 20 years, GE HealthCare's GoldSeal program has played a vital role in reducing medical imaging equipment waste by promoting and enabling the reuse of equipment and parts from de-installed imaging systems.

GE HealthCare recycles about 94–96% of most systems. In a typical year, GoldSeal recycles approximately 8,000 pieces of imaging machines and ultrasounds.*

When you choose a GoldSeal system, you extend the life of an imaging system, revitalizing a viable piece of medical technology and potentially extending healthcare to those who may not otherwise have access.

GE HealthCare

About GE HealthCare

GE HealthCare is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services, and data analytics to make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 100 years, GE HealthCare is advancing personalized, connected, and compassionate care, while simplifying the patient's journey across the care pathway. Together our Imaging, Ultrasound, Patient Care Solutions, and Pharmaceutical Diagnostics businesses help improve patient care from prevention and screening, to diagnosis, treatment, therapy, and monitoring.

We are an \$18 billion business with 51,000 employees working to create a world where healthcare has no limits. Follow us on [Facebook](#), [LinkedIn](#), [Twitter](#), [Instagram](#) and [Insights](#) for the latest news, or visit our website gehealthcare.co.uk for more information.

* Products within MR, CT, Nuclear Medicine, and PET/CT are eligible for reconditioning, although whether a system is reconditioned versus harvested for parts or otherwise recycled or reused is dependent on the state of the system when GE HealthCare takes possession of it.
